

B&A Cyber, Inc - Capabilities Statement

Established in 2025, B&A Cyber, Inc. is a Service-Disabled Veteran-Owned Small Business (SDVOSB) providing high-performance cybersecurity, privacy, and risk advisory services. With a global service delivery footprint, we bridge the gap between complex business requirements and technical security controls through deep architectural research and defensive engineering. We measure success through tangible financial benefit, risk reduction, and the enhancement of organizational reputation. Our People: Our practitioners average over 15+ years of experience and are active contributors to global security standards (NIST, ISO, PCI).

Core Capabilities

- **Identity & Zero Trust:** Full IAM lifecycle services including privileged access management (PAM), strong authentication, and automated identity governance.
- **Hybrid & Multi-Cloud Integration:** Holistic secure cloud services for AWS, GCP, and Azure that align adoption with data governance and compliance.
- **Federal Compliance (FedRAMP/CMMC):** Readiness and remediation services to accelerate agency and contractor certification.
- **Governance & Risk (GRC/TPRM):** Full lifecycle Third-Party Risk Management, benchmarking, and process optimization.
- **Defensive Engineering:** Vulnerability Assessment and Penetration Testing (VA/PT) integrating manual testing with risk-based prioritization.

Differentiators

- **Socio-Economic Advantage:** Certified SDVOSB and Minority-Owned Small Business with a majority veteran-led ownership structure.
- **Federal Mission Expertise and Experience:** Extensive direct experience navigating the Department of Defense (DoD) and FedRAMP frameworks.
- **100% Engagement Success Rate:** A relationship-driven model with a perfect track record of delivery excellence and executive-level advisory.
- **Compliance-Centric Cloud:** Holistic secure services that synchronize rapid cloud adoption with strict data governance across AWS, GCP, and Azure.
- **Advanced ICAM Governance:** Technical proficiency in Identity, Credential, and Access Management (ICAM), specializing in strong authentication and automated governance workflows.
- **Cleared and Certified Subject Matter Experts:** Personnel with a proven history of supporting sensitive U.S. Government assignments, maintaining readiness for engagements requiring high-level security clearances. Personnel certifications include CISSP, CISM, ISSMP, CRISC, Six-Sigma, PMP, PgMP, and ITIL, Cisco and AWS cloud certifications.
- **Global Service Reach:** Established delivery footprint across North America, EMEA, and South America.
